

Terentiy Gatsukov

iGaming × .NET Backend × Real-Time Systems

Minsk, Belarus · terentiy.gatsukov@gmail.com · github.com/lilter96 · linkedin.com/in/terentiy-gatsukov-048694224

PROFESSIONAL SUMMARY

Backend engineer working at the intersection of iGaming, .NET, and real-time systems. I build slot-game backends, provably-fair RNG engines, real-money transaction pipelines, and crypto trading infrastructure — code that processes real money, powers live games, and runs under regulatory scrutiny. Full-stack capable with React/TypeScript. Strong advocate for TDD, clean architecture, and verifiable delivery.

DOMAIN EXPERTISE

- Slot-game backend development on the myKonami / Aristocrat platform
- RNG certification flows & jurisdictional compliance
- Real-money transaction pipelines & player wallet systems
- Provably-fair systems (HMAC-SHA256) & game math engines
- Platform integration & operator tooling
- Full-stack delivery: .NET backend + React/TypeScript frontend
- Blockchain tooling: TON SDK, OKX perpetuals trading signals

EXPERIENCE

Senior .NET Backend Developer

Custom Games Studio · Sep 2022 — Present

Backend development for casino slot games on the myKonami/Aristocrat platform. Designed and built game logic engines, real-money transaction pipelines, and operator tooling for a multi-title casino backend platform. Integrated RNG certification flows and jurisdictional compliance requirements.

Fullstack Developer (.NET + React)

Solvintech · Jun 2021 — Aug 2022

Developed and maintained web applications across the full stack. Built REST APIs with ASP.NET Core and interactive UIs with React and TypeScript. Worked on real-time features, database design, and CI/CD pipelines.

Software Developer

Elgrow · Mar 2020 — May 2021

Contributed to commercial software projects using .NET and related technologies.

Software Developer

Syberry CIS · Jan 2019 — Feb 2020

Worked on enterprise client projects. Gained experience in full-cycle development, code review, and agile team practices.

Junior Developer

Softeq · Mar 2018 — Dec 2018

Started professional career. Built foundational skills in software engineering practices and team collaboration.

EDUCATION & LANGUAGES

BSc Engineering — Belarusian State University of Informatics and Radioelectronics (BSUIR), 2019–2023

English — Fluent · **Russian** — Native

TECHNICAL SKILLS

Backend: C# / .NET, ASP.NET Core, SignalR, Entity Framework Core, F#

Data: PostgreSQL, Redis

Frontend: React, TypeScript, PixiJS, Phaser

Domain: iGaming (Slots), Provably Fair Systems, Game Math / RNG, Crypto / Blockchain

Blockchain: TON SDK, OKX API

DevOps: Docker, GitHub Actions, CI/CD

Practices: TDD, Clean Architecture, REST / gRPC

FLAGSHIP PROJECTS

TGSlots — Social Casino Telegram Mini App

● Live

Full-stack social-casino Telegram Mini App. Real-time multiplayer with SignalR, Hangfire job processing, and TON blockchain integration for token transactions. Live at tgslots-marketing-production.up.railway.app

C#, ASP.NET Core, SignalR, PostgreSQL, Redis, TON, React, TypeScript, Phaser

Slot Math Library

● Personal

Standalone TS + Bun library implementing professional slot mathematics: probability monads, Walker's Alias Method, Trie-based payline evaluator, Monte-Carlo RTP verification harness.

TypeScript, Bun, Probability Theory, Monte-Carlo Simulation

Provably Fair Slot Demo

● Personal

Production-grade slot machine with HMAC-SHA256 provably-fair RNG, client-side verification, authentic weighted reel strips, and multi-line payline evaluation.

C#, .NET 10, HMAC-SHA256, PixiJS, iGaming Math

SMC/ICT Trading Signal Engine

● Personal

Algorithmic trading signal generator for OKX perpetual futures. Smart Money Concepts and ICT methodology with functional-core / imperative-shell architecture.

F#, C#, OKX API, WebSocket, Algorithmic Trading

crypto-exchange-rates

● Open Source

Real-time multi-exchange cryptocurrency price tracking. Aggregates order-book and ticker data via WebSocket/REST.

github.com/lilter96/crypto-exchange-rates

C#, .NET 7, ASP.NET Core, WebSocket, REST, CryptoExchange.Net

Casino/Slot Backend Platform

● NDA

Multi-title casino backend platform on the myKonami/Aristocrat stack. Game logic engines, real-money transaction pipelines, operator tooling, real-time jackpot system. Custom Games Studio — specific metrics under NDA.

C#, .NET, myKonami, Aristocrat, PostgreSQL, Redis, SignalR
